

GEOMATIX Ltd

Geo-Spatial Solutions & Applications

Location and Positioning
Data Capture
Navigation
Mapping

"Location-based management is rapidly emerging as a high-priority, both on land and at sea. Successful management strategies demand increasingly innovative and reliable information delivery systems.

With over 10 years experience in the design of geo-spatial systems GEOMATIX has gained a considerable reputation for creating high-quality innovative applications and solutions.

Our products are in regular use today, forming key components in web-based and stand-alone information delivery systems; providing point-and-click answers to locally generated location-based queries.

Whatever your aims, whether adding value, service provision or risk management, we promise to work together with you to find the right technical solution - enabling you to achieve your location-based objectives as quickly as possible."
